

Evacuaid Escape

New and unique emergency bracelet for faster and safer evacuation

Are you responsible for others safety?

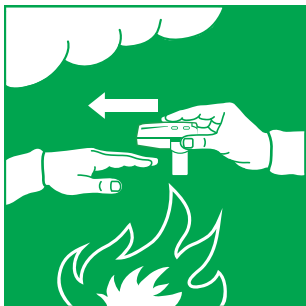

Do you have challenging escape routes?

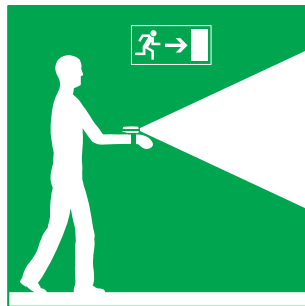

Do you work in hazardous areas?

When the alarm is triggered, not everybody can quickly leave the building. Making sure people you are responsible for get out safe, or finding your own way out can be hazardous.

Evacuaid is used by evacuation leaders in a number of industries, by workers with challenging escape routes, emergency reponse teams and lone workers.

Simply strap on to activate

Find the way out and execute tasks with both hands free

Automatic alarm - be found when time is critical

Mark others

Crowd control

Prepared for the unexpected

How Evacuaid saves lives

✓ **Enhanced personal safety during evacuation**
 Evacuaid will automatically detect if you fall unconscious. A powerful combination of sound and light is triggered – ensuring dramatically quicker retrieval by colleagues or rescue personnel.

✓ **Increased capabilities to help others**
 Evacuaid helps you become prepared and authoritative as an evacuation leader. It allows you to execute tasks and search the area with both hands free and mark others in need of assistance.

✓ **Always at the ready for evacuation**
 Wall mounted by fire alarm panels and extinguishers, at rally points, in tunnels and along challenging escape routes. Evacuaid can also be stored together with escape equipment, like escape-hoods and -chairs, in fire marshall kit or worn on belt.

Wall mount bracket is included

Simply strap on to activate - One size fits all

As Evacuaid in most cases is not a personal device, it is vital that the strap fits all wrist sizes. The strap might feel tight, but a secure fit is necessary to ensure activation in all situations. When the bracelet is taken off, the bracelet automatically deactivates, ensuring no false alarms.

Standing by in case of emergency

With our optional hazard kit Evacuaid can be fastened in the belt or on personal equipment and still be active, ready to alert others if something happens. By turning the flashlight off Evacuaid can function as a man down device for people working in hazardous areas or confined spaces for up to 300 hours.

Optional multipurpose clip

Unique patented technology developed in Norway

Red LED alarm lights for optimal smoke penetration

Powerful 90 dB alarm at 3 m distance

Motion sensor for automatic alarm
 Long lasting AA lithium batteries
 6 years storage / 200 hours of
